

# ARP Enterprise Edition v4.2 – Release Notes

This note provides a high-level description of the new features offered in the current version of ARP Enterprise Edition. Important bug fixes in each patch release are also identified, whilst low-level fixes are ignored.

## ARP Enterprise Edition v4.2

November 2007

- Communication protocol is modified and now ARP Enterprise Edition may include OCSP Response or CRL in the response being sent to the calling application.

## ARP Enterprise Edition v4.1

July 2007

- SSL based communication is supported between ARP Enterprise and ARP Lite.
- Help file can be opened in Adobe Acrobat 8.
- An option is provided during the installation which prompts user to select if ARP should only be the revocation provider available on this system.
